PROFESSIONAL SUMMARY

AI/ML Engineer and Data Scientist (B.Tech, Information Technology, 2027) with hands-on experience building end-to-end machine learning, deep learning, computer vision, and LLM-powered applications in Python. Skilled in data preprocessing, EDA, feature engineering, model training and evaluation, and deployment using TensorFlow, PyTorch, Scikit-learn, Flask, and Streamlit. Completed Microsoft and AICTE-backed AI and software engineering internships and solved 450+ DSA problems.

TECHNICAL SKILLS

Programming & Web: Python, SQL, Java,

Data Preprocessing & Visualization: Data Collection, Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, NumPy, Pandas, Matplotlib, Seaborn

Machine Learning: Supervised Learning (Classification & Regression), Unsupervised Learning (Clustering & Dimensional Reduction), Ensemble Methods (Random Forest, XGBoost), Reinforcement Learning, Scikit-learn, Kaggle

Model Evaluation: Precision, Recall, F1 Score, Cross-Validation, Bias-Variance Tradeoff, Model Training & Evaluation

Deep Learning & Computer Vision: Neural Networks, Forward & Backward Propagation, FNN, CNN, RNN, LSTM, Transformers; PyTorch, TensorFlow, Keras, OpenCV, MediaPipe

Generative AI & NLP: Large Language Models (LLMs), Natural Language Processing (NLP), GANs, Hugging Face, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Agentic AI, OpenAI API

Databases & Tools: MySQL, MongoDB, Supabase, Model Deployment, Git, GitHub, Data Structures & Algorithms (DSA)

EXPERIENCE

AI/ML Virtual Intern – Foundations of Artificial Intelligence

Microsoft Initiative, implemented by Edunet Foundation in collaboration with AICTE | Apr 2025 – May 2025 (4 weeks, Remote)

- Completed an industry-backed internship covering AI and Machine Learning (ML) fundamentals, model-building workflows, and real-world AI application development.

Software Engineer Intern

Taskinterns Software | Jun 2026 – Jul 2026

- Developed and delivered a DSA Visualization web application using React.js and JavaScript, featuring interactive step-by-step visualizations of data structures and algorithms.
- Collaborated with cross-functional teams and the Founder's Office; independently resolved issues and managed delivery.

PROJECTS

SnapClass AI – AI-Powered Attendance Management System

Python, Streamlit, dlib, face_recognition, Librosa, Resemblyzer, Supabase, bcrypt, segno [GitHub](#) | [Demo Video](#) | [Live Demo](#)

- Developed an AI attendance system combining face recognition (dlib, face_recognition), voice-based speaker verification (Librosa, Resemblyzer), and QR code validation in a multi-modal identity pipeline, eliminating proxy attendance.
- Integrated Supabase cloud database, bcrypt authentication, and dynamic QR codes, reducing manual attendance processing time by 80–90%.

AI Realtime Gym Coach – Computer Vision and LLM Fitness Assistant

Python, MediaPipe, OpenCV, Streamlit, Groq LLM API, gTTS [GitHub](#) | [Demo Video](#) | [Live Demo](#)

- Built and deployed a real-time AI fitness coaching application that analyzes exercise form from webcam video using pose estimation combined with a large language model.
- Applied MediaPipe to track 33 body landmarks in real time for exercise form analysis; integrated the Groq LLM API for personalized workout suggestions and form corrections via prompt engineering.
- Added hands-free voice coaching with gTTS and deployed a browser-based Streamlit app with real-time inference.

Flappy Bird AI – Deep Reinforcement Learning Agent (DQN)

Python, PyTorch, Gymnasium, NumPy, Matplotlib [GitHub](#)

- Built an agent that learns to play Flappy Bird using a Deep Q-Network (DQN) in PyTorch, improving over time through rewards and penalties from the Gymnasium environment.
- Implemented Experience Replay and an epsilon-greedy strategy to balance exploration and exploitation.

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

Expected 2027

IEC College of Engineering & Technology (AKTU), Greater Noida, Uttar Pradesh | SGPA: 7.96/10 (up to 6th Semester)

Class XII | Greno Public School, Greater Noida | 2022–2023 | 81.8%

ACHIEVEMENTS

- Solved 450+ Data Structures and Algorithms (DSA) problems on [LeetCode](#) and [GeeksforGeeks](#).
- Awarded Merit-Based Scholarship of ₹20,000 for outstanding academic performance (2023–2024).
