PROFESSIONAL SUMMARY

Software Engineer (SWE) and Full Stack Developer pursuing a B.Tech in Information Technology, with a strong foundation in Java, Data Structures & Algorithms, and OOP. Experienced in building MERN applications, microservices, REST APIs, JWT authentication, and AI systems using LangGraph, LangChain, and RAG. Solved 450+ DSA problems.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Frontend: React.js, Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS, Bootstrap, EJS

Backend: Node.js, Express.js, REST APIs, Microservices, API Gateway, Socket.IO, JWT Authentication, bcrypt, FastAPI

Databases: MongoDB, MongoDB Atlas, MySQL, Redis, Qdrant (Vector Database), Firebase

AI / Generative AI: LangGraph, LangChain, RAG, Embeddings, Vector Databases, Multi-Agent Systems, OpenRouter API, Groq API, OpenCV, MediaPipe

Tools & Cloud: Git, GitHub, Docker, AWS, Postman, Stripe API

EXPERIENCE

Software Engineer Intern, Taskinterns SoftwareJun 2026 – Jul 2026

- Developed and delivered a DSA Visualization web application using React.js and JavaScript, featuring interactive step-by-step visualizations of data structures and algorithms.
- Collaborated with cross-functional teams and the Founder's Office; independently resolved technical issues and managed project delivery.

AI/ML Virtual Internship – Foundations of Artificial Intelligence

Apr 10 – May 10, 2025

Microsoft Initiative, Implemented by Edunet Foundation, in collaboration with AICTE

- Completed a 4-week virtual internship focused on **Artificial Intelligence and Machine Learning fundamentals**.
- Gained hands-on experience with **AI/ML concepts and real-world applications** and improve **AI/ML problem-solving and practical skills**.

PROJECTS

CORTEX-AI — Multi-Agent AI Platform | MERN, Microservices, LangGraph, LangChain, RAG, Qdrant, Redis, Docker, AWS

GitHub: [CORTEX-AI](#) | [Demo Video](#)

- Architected a multi-agent AI platform on the MERN stack with 5 microservices (Gateway, Auth, Chat, Agent, Billing) behind a gateway.
- Built a LangGraph router agent dispatching prompts to 8 specialised agents (chat, search, coding, PDF, RAG, PPT, vision) with graph-based state management and tool calling and also implemented a RAG pipeline with LangChain and Qdrant.
- Secured services with JWT authentication, cut latency and LLM API cost with Redis caching, and containerized with Docker.
- Deployed the platform on AWS and documented the complete working system through a local demo video.

MERN AI Website Builder | MongoDB, Express.js, React.js, Node.js, OpenRouter API, Monaco Editor, Firebase, Stripe

[Live](#)

GitHub: [webSiteBuilder](#)

- Built a full-stack AI website builder that generates and edits websites from natural-language prompts via the OpenRouter API.
- Integrated Monaco Editor for in-browser code editing and implemented user authentication and storage with Firebase.
- Built Stripe payments, designed RESTful APIs with Express.js, and deployed on Render.

Real-Time AI Gym Coach | Python, OpenCV, MediaPipe, Streamlit, WebRTC, gTTS, Groq API, Pandas

[Live](#)

GitHub: [AI GYM Coach](#)

- Built a real-time exercise coaching application that processes live webcam video using OpenCV and WebRTC.
- Implemented MediaPipe pose detection to track body landmarks, count repetitions, and analyze posture in real time.
- Integrated the Groq API for LLM coaching feedback and gTTS for voice guidance; tracked workout data with Pandas.

EDUCATION

Bachelor of Technology (B.Tech) — Information TechnologyExpected 2027

IEC College of Engineering & Technology (AKTU), Greater Noida | **CGPA: 8.1 / 10 (till 6th Semester)**

Class XII, Greno Public School, G B Nagar | **Percentage: 81.8%**2022 – 2023

ACHIEVEMENTS

- Solved 450+ Data Structures and Algorithms problems — LeetCode: [krishna_123rt](#) | GeeksforGeeks: [krishnd33g](#).
- Merit-based academic scholarship (₹20,000); designed, developed, and deployed 6+ full stack web applications.
